- Time-Management

# Karina Lama

## ABOUT ME

As a BCA graduate passionate about technology and innovation, I am eager to bring my skills to a dynamic role in any challenging environment. With a strong focus on effective communication and problem-solving, I aim to contribute meaningfully to organizational success while continuously learning and growing.

## COLLEGE PROJECTS

### Online Vehicle Rental System (HAMRO GADHI) 2022 JAN

Develop an automated vehicle rental system using PHP, HTML, JavaScript, enhancing customer satisfaction and reducing operational costs.

### Place Recommendation System (PlaceFinder) 2023 APRIL

Created a personalized recommendation system utilizing machine learning techniques to improve user experience and reduce attrition.

### Weather App 2023

Develop a mobile weather application using JavaScript and open API keys for real-time weather data.

### Second hand car price prediction system 2024

Develop a Second-Hand Car Price Prediction System using machine learning algorithm Random Forest Regression to predict car prices based on car features. Build with Flask and Python, the system offers predictions and stores results in a database.

## Workshops and Training

- Basic Python
- Live Hackathon
- Kali linux
- Adobe Photoshop

## Experience

- 2 month intern on ReactJs at Spyders Lab Pvt.Ltd
